BUSINESS INTERRUPTION WORKSHEET - GROSS PROFIT FORM (ADDITIONS BASIS)

Insured:

Locations:

Note 1. CONTINUING CHARGES AND EXPENSES, that is all charges and expenses that do not reduce proportionately with any reduction in sales or turnover. Many expenses which could be discontinued during a long shut down would not be reduced during a short or partial shut down. They should therefore be included to obtain full protection for a partial loss. Be sure the estimated amount for twelve months is inserted against each item applicable to the business.

Note 2. It is important to keep in mind that an interruption to the business arising out of the insured perils could occur towards the end of the next annual term and it is, therefore, necessary to anticipate at least two years ahead when calculating the amount of insurance required.

#	CATEGORY OF EXPENSE	ACTUAL VALUES	ESTIMATED VALUES
